at

Join SEPA and Nest for a revealing and interactive look Beyond the Meter (BTM).

Smart energy devices with demand response, customer-sited solar, electric vehicles, storage and related technologies are fast becoming a huge factor in the consumer electricity landscape. Accessibility and affordability mean a growing need for a more flexible and interactive grid.

If this sounds familiar, this one-day workshop is for you. Industry leaders investigate today's tech-savvy consumer and the successful integration of BTM technologies. We'll discuss new market structures, grid planning strategies, business models, and enabling technologies.

Gain knowledge from real world examples about the deployment of these technologies from utility and industry leaders that have successfully launched BTM programs.

Hot Topics:

- Beyond the Meter Overview
- Wholesale and Retail Market Designs
- Best Practices for Program Design
- Technical Integration Advice
- Synchronizing BTM Technology Deployment in the “Energy Cloud”

Registration:	Date and Time:	Location:
$495 - SEPA members $595 - non-members	Monday, July 11, 2016 9:00am-5:00pm (includes lunch and breaks)	Marriott Metro Center 775 12th St NW, Washington, DC
